

BIO

I am an architect whose work focusses on the architectural potential of large scale motion and user-transformation of space, with the intent of making the physical environment more engaging and relevant to contemporary society.

I believe that the buildings we shape, shape us. Therefore, we can use our urban and architectural local heritage to shape our values and future development.

Since 1986, when I attended at Ain Shams University, Faculty of Engineering Department of Architecture (FEDA), I have been sharing my philosophy with my students on how to have distinctive thoughts via the language of the future. I am proud that most of my colleagues at Cube were at one time my students. I actually love and believe in them all.

After 25 years of strenuous efforts to convert dreams into reality, I have been fortunate, as an Egyptian architect, in collaboration with a creative team, to navigate through seventhoussand years of a great civilization and been able use this heritage to raise the nation's society level. This has allowed our society to maintain its superior position worldwide and to restore Egyptian leadership.

I believe that the more we indulge in localization and nationalism the more likely we are to achieve international recognition. The formation of our houses and our urban architectural environment reflects our community and the future generation. Therefore, architecture is basically a reflection of the society and its development mechanism.

Also, I believe that the quality of architecture could impact on our quality of life. As we shape our shelters, so we shape our future. All aspects that have an impact on our quality of life, such as the surrounding environment, health, safety, freedom, all the related positive and negative issues, etc... should lead us to accomplish sustainability, progress and public development. The future is different and we should recognize how to deal with it, how to communicate and how to write in the future language of architecture

Personal Information

Full name: Ashraf Mohamed Abdel Mohsen Elsayed

Date of Birth: June the 18th, 1964

Marital Status: Married, with three kids

Nationality: Egyptian

Work Address:

Academic: FEDA Faculty of Engineering, Department of Architecture, AinShamsUniversity

Website: www.asufeda.org

Business: CUBE Consultants, Cairo - Egypt

Cairo, egypt , Tel: +202 2620 80 45/ 46

URL: www.cubeconsultants.org
